

## Skype™ Phone Adapter – B2K

The Skype Phone Adapter B2K provides you the option to use your current phone system while adding Skype services. This adapter unit allows you to make and receive regular PSTN phone calls, as well as Skype Internet communications on your existing phone.

By using the B2K adapter you can route incoming Internet phone calls to your existing home phone. Your home phone will ring for all incoming regular PSTN and Skype calls.

You can also use your regular phone to dial, make a call, and hang up an Internet phone call. By pressing the \* key on the phone you can switch between PSTN and Internet phone calls easily.

You can even unwire your Skype calls by using a standard cordless phone.

### Features

- Unlimited long distance calling in North America with a SkypeOut plan
- Allows to place and receive both VoIP calls and regular PSTN calls on your existing phone
- Phone rings for all incoming VoIP and PSTN calls
- VoIP or PSTN calls selected by phone key (\*)
- Excellent sound quality. Better than regular long-distance phone lines.
- Quick and easy setup, connects to any phone jack using regular phone cord and your computer using USB cable

### Examples Uses

- You want to place a Skype call to your friend in France from the convenience of your living room. Simply pick up a phone connected to the device, dial \* and start talking in no time.
- You are missing important incoming Skype calls by being in a different part of the house, away from the computer. Simply connect Skype Phone Adapter and your phone will ring for any incoming Skype and regular calls.

### Benefits

- Use your existing phone to place and receive VoIP calls over the Internet
- Take full advantage of Skype calling by using your existing wireless phone to dial and receive Skype calls
